Module E1 TOGAF 9.1 Changes Overview

The Open Group Architecture Framework (TOGAF) is a framework for enterprise architecture that provides an approach for designing, planning, implementing, and governing an enterprise information technology architecture. TOGAF is a high level approach to design. It is typically modeled at four levels: Business, Application, Data, and Technology.

The Open Group Architecture Framework - Wikipedia

Architecture Repository. Supporting the Enterprise Continuum is the concept of an Architecture Repository which can be used to store different classes of architectural output at different levels of abstraction, created by the ADM.

Information! Information is a key resource for all enterprises. Information is created, used, retained, disclosed and destroyed. Technology plays a key role in these actions.

COBIT 5 Introduction - ITGI

Solution architecture is a practice of defining and describing an architecture of a system delivered in context of a specific solution and as such it may encompass description of an entire system or only its specific parts. Definition of a solution architecture is typically led by a solution architect. There are many definitions of "solution architecture" in the industry but no official ...
