This is my suggestion for an ideal state, a single work cell comprising of all of the various operations, taking supplied product from a "supermarket" using a kanban system; the supplier replenishing daily also through kanban.

Creating your Ideal and Future State Value Stream Map

A lot of people ask what is ASA? The ASA in Cisco ASA stands for Adaptive Security Appliance. In brief, Cisco ASA is a security device that combines firewall, antivirus, intrusion prevention, and virtual private network (VPN) capabilities.

What is the Cisco ASA & Cisco ASA Firewall?

The term downtime is used to refer to periods when a system is unavailable. Downtime or outage duration refers to a period of time that a system fails to provide or perform its primary function. Reliability, availability, recovery, and unavailability are related concepts. The unavailability is the proportion of a time-span that a system is unavailable or offline.

The details about these tools will be brief as books are written about each item. Think of the presentations below as hors d'oeuvres (a little snack food or starters) not the main course. The most important reliability tool is a Pareto distribution based on money specifically based on the cost of unreliability which directs attention to work on the most important money problem first.
