Preferred languages: C/C++, Java, and Ruby.. I am looking for some helpful books/tutorials on how to write your own compiler simply for educational purposes. I am most familiar with C/C++, Java, and Ruby, so I

prefer resources that involve one of those three, but any good resource is acceptable.

language agnostic - Learning to write a compiler - Stack

Ada is a structured, statically typed, imperative, and object-oriented high-level computer programming language, extended from Pascal and other languages. It has built-in language support for design-by-contract, extremely strong typing, explicit concurrency, tasks, synchronous message passing, protected objects, and non-determinism. Ada improves code safety and maintainability by using the ...

IGTI - Rotordynamics.org Technical Literature

It's not hard to write IO code in pure functional languages. They all provide a simple mechanism for writing IO code that works just like it does in imperative languages. All they do is enforce that you can't call IO code inside other code whose interface is declared as not performing IO. An analogy would be a dynamic language programmer complaining that a statically typed language like Java ...
